

How to Update Maps

Updating maps consists of two major parts to be performed in order.

Part 1. Update firmware.

Part 2. Update Maps.

NOTE:

- Make sure that your computer has access to Internet. You'll need to get an Activation Code from the website during the updating process.
- Make sure that your C520 is not in a low battery status.

Part 1. Update Firmware

1. Turn on your C520 and connect it to the computer via the USB cable.
2. Insert the DVD to the DVD drive of your computer.
3. The auto run program starts. Select the language you want for the update wizard.
4. The main menu appears. Click **Update Firmware**.

5. In the next screen, click **Next**.
6. In the next screen, click **Next**.
7. In the next screen, click **Browse** to select a folder or accept the default folder for the temporary backup files.

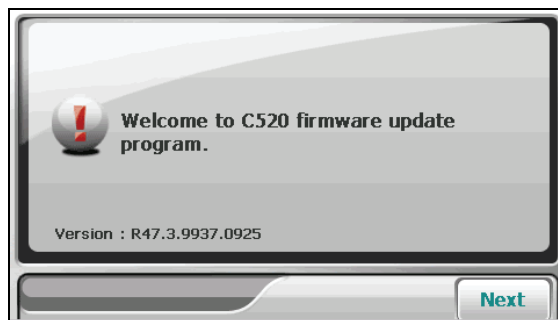

8. Click **Next**. A progress bar appears on the screen. Wait for the backup and firmware transfer procedure to complete.

9. When the next screen appears, disconnect the USB cable and click **Next**.

Do not exit the update wizard yet. You'll need to go back to the wizard after the firmware of your C520 has been updated.

10. Once the USB cable is disconnected, the screen as shown below appears on your C520. Tap **Next** to continue.

11. Wait for the firmware update to complete. Then, your C520 will automatically restart. Follow the onscreen instructions to calibrate the screen and set the language and data/time.
12. When the Home screen appears on your C520, reconnect the USB cable. Once the cable is connected, the update wizard on your computer resumes and performs the "Restoring data" procedure.
13. When the window pops up telling you the update is completed, click **OK**. (The wizard will automatically delete the backup files after the restoring process.) You are now back to the main menu. Proceed to **Part 2**.

Part 2. Update Maps

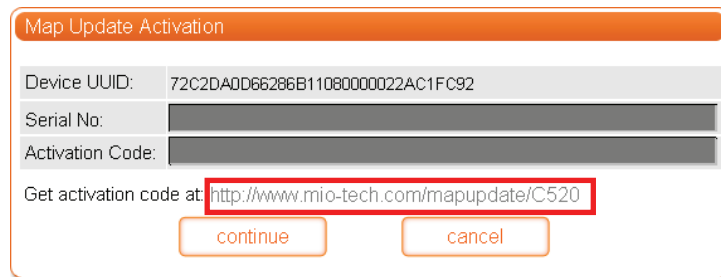

14. On the main menu, click **Update Maps**.

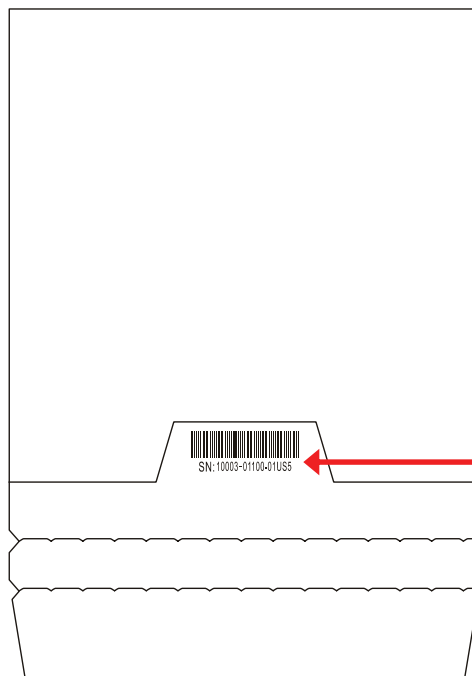

15. In the next screen, click **Update**.

16. The “Map Update Activation” window pops up. Click the hyperlink to access the website where you can get the **Activation Code**.

17. Follow the instructions on the website to get the unique **Activation Code** for your device.

You can find the serial number after opening the package.

18. Go back to the “Map Update Activation” window and enter the **DVD Serial No.** and **Activation Code**. Then click **Continue**.

19. The progress bar indicates the progress of the updating. It takes about 30 minutes to complete.

20. When the “Update complete” message appears, click **OK**.

Now you can use the new map.
